Zumtobel Lighting has partnered with Armstrong[®], a global leader in the design and manufacture of ceilings, to introduce Armstrong's new TechZone[™] ceiling system.

Currently, two Zumtobel Lighting fixtures are TechZone compatible: BIVERGENCE 6x4 and ARIA.

TechZone is ideal for large expanses and open areas requiring superior acoustics and a clean linear visual, such as libraries and media centers, open plan office spaces, upscale retail settings and airports.

Ceiling Systems

Armstrong[®]
ZUMTOBEL

BIVERGENCE 6x4

a narrow aperture recessed direct louvered luminaire for individual and continuous run mounting. The superior BIVERGENCE louver technology provides excellent glare control and creates pleasant working environments. Lamp options include (1) or (2) T5 / T5HO lamps or (1) T8 lamp.

TechZone partners

Industry-leading suppliers have engineered and designed lighting, diffusers and fire protection products for use in TechZone™ Ceiling Systems. All Armstrong TechZone compatible products are qualified for fit and finish with TechZone Ceiling Systems. They are readily available products using standard components and they can be specified, bid, purchased and installed using traditional methods.

ARIA

an indirect/direct pendant luminaire that combines precision optics with modern styling, ideal for cutting-edge architectural applications. ARIA's indirect light distribution creates beautiful glowing spaces with bright ceiling and wall surfaces. ARIA uses (2) T5 or T5HO lamps
