

Sternberg: SLS Lighting's newest addition

OUTDOOR LIGHTING CREATED AND DESIGNED EXCLUSIVELY FOR THE CITY

Galesburg, a small community in west central Illinois decided to enhance and improve their downtown street image with a totally new look of lighting, signage and site amenities.

To redesign their streetscape, the Public Works department worked with the **Smith Group, JJR, Landscape Architects**, in Chicago, IL and Sternberg Lighting. The result was the "Galesburg" down light luminaire, that was specifically created and manufactured for the city.

The design theme was carried through from a single and double, type III refractorized glass acorn to roadway and pedestrian style lighting. Metal Halide lamping, using 70 and 350 watts, was used with a mogul base. All of the installations were placed on 21 or 27 feet, above grade, cast aluminum, clam shell base Stratford poles.

The installation in Galesburg consisted of assemblies of 34 singles, 30 twin fixtures and 39 installations of street / walkway style with banner arms, medallion brackets and painted in a custom 2-tone green and gold finish.

This outstanding installation is a good example of custom lighting, completing a totally new look. Sternberg's newly designed fixture and pole is complemented by the city's unique custom design emblems. Street benches with emblems and

"Our lighting is an important aspect and permanent city feature that enhances our streets."

signage were also added completing the overall look of continuity.

Lighting is one of the most important aspects and prominent features of a city or town.

Whether the concern is preventing light trespass or meeting local lighting ordinances, Sternberg's experience with a variety of optical systems enabled Galesburg to enhance their streets and complement downtown building designs with effective lighting.

This type of renovation, with the city's rich history, of citizen involve-

ment with collaborative endeavors, boasts a truly unique public and

private partnership that will encourage Galesburg's economic growth.

The 1921 Galesburg Luminaire Series and the 2201SS Stratford clam shell base pole are now permanent products displayed in our new updated, 2007-2008 Catalog.

Our thanks to the agents at **Pilipuf / Grist & Associates** in Elk Grove Village, IL, for their expertise and assistance in bringing in this impressive and magnificent installation.
