SLS Lighting picks up new line Times Square Lighting

<http://www.tslight.com>

Times Square Lighting [TSL] has been the leading manufacturer of theatrical lighting and accessories for over 70 years. To meet the demands of our international clientele, we decided to add on to our business and include products geared toward the architectural and display industries.

TSL's family owned and operated company prides itself on built-to-last products, innovative design and quality customer service. We strive to meet the needs of our market and continually search for new breakthroughs in technology to create an even more extraordinary line of lighting and accessories than we do today.

FEATURED PRODUCTS USED AT LOEBER MOTORS:

MC20 (39W PAR20)

The MC20 is ideal for short to medium throw applications where an energy efficient fixture is required. The MC20 utilizes a 39-watt PAR metal halide lamp equal in output to a 90-watt PAR. Lamps are available in a spot or flood format and can be altered by using color filters, glass diffusers, barndoors and hoods. Times Square Lighting uses the best electronic ballasts on the market for our units and they carry a 5-year warranty.

NEW PRODUCT REVIEW:

A39T6H (39W T6) and A70T6H (70W T6)

The A39T6H and the A70T6H are ideal for commercial and retail wall wash applications. These units utilize a high performance T6 metal halide lamp with a textured reflector in 39 or 70-watts. They feature a hinged front for easy re-lamping, electronic horizontal ballast, locking yoke and accessory holder.

Since 1985, **SLS Lighting** has been dedicated to providing the lighting industry in B.C. with the highest quality and most innovative products available. We utilize the latest technology and design to provide the link between the design community, contractors, distributors and industry resources.

SLS specializes in creating visually comfortable illumination solutions for commercial and institutional settings as well as many other lighting requirements.
