Wila LouverLites – Multifunctional louvered downlight

132 Series LouverLites

The 132 multifunction series louvered downlight combines compact fluorescent and low voltage MR 16 lamplighting together in a single downlight. Unique dimming and switching capabilities allow for multiple lighting levels creating different lighting moods in the space. **also available in other lamplighting combinations**

Applications: This product is ideal for conference rooms, retail spaces, multi-media, and high traffic areas.

Reflectors: LouverLites are provided with computer designed, lamp specific, post Alzak anodized reflectors of pure aluminum (99.98%) to provide glare and iridescence free performance.

Rated: UL / CUL, Damp Location
